

PDPI SHELF SHAPERS ADJUSTABLE SHELF STORAGE

PDPI SHELF SHAPERS:

Adjustable to fit in any width pallet rack system.

Two shelf widths available to help you customize your storage areas.

Easily adjusts to meet your ever changing storage needs.

A quick and simple way to create custom size storage areas for all your products –

Production Design Products, Inc. presents a new concept for forming custom sized storage compartments for all of your finished goods and standard inventory. Shelf Shapers install in standard pallet racking and easily adjust to allow you to form a perfect storage area for any of your products.

Perfect Solution for Special Mat Storage –

The Shelf Shaper system easily adapts to be used with PDPI's Mat Hive system. The shelves adjust to give you a perfect storage compartment for multiple duplicate logo mats. For example, group all of your local bank logo mats on one shelf for ease of storing and retrieving for delivery.

PDPI SHELF SHAPERS COMPONENTS

End Panels

Every individual shelf requires 2 end panel pairs. One pair on the left end and one pair on the right end.

Center Panels

Center Panel Pairs are used to divide your shelf into either 16 or 24 inch (nominal) wide sections. End supports of the Center Panels are C shaped channels that are notched on both sides to accept the adjustable shelves. The number of Center Panels you will require will vary with the shelf configuration you select.
